DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 30, 2005 has been entered.

2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach, disclose or fairly suggest a calendar molded or thermoformed deep molded non-woven web having multiplicity of compressible projections that return to their shape after compression wherein the non-woven substrate is a non-melt blown non-woven fabric manufactured from filaments and/or fibers with a diameter of 100 microns or less having a constant anisotropy ratio between $-1/2$ and $+1/2$ throughout the substrate that provides a generally constant random fiber orientation distribution throughout the substrate in combination with all of the other limitations of claims 1 and 25. The examiner is relying on the applicants' arguments on pages 9-14 filed October 30, 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
